---

## PROFESSIONAL SUMMARY

---

Software Engineer with over 15 years of experience in information technology. I have worked in various companies and as an external consultant in sectors such as commerce, agriculture, and manufacturing. I specialize in automating recurring processes and integrating systems to improve operational efficiency. I develop and adapt custom solutions to optimize team workflows.

## TECHNICAL SKILLS

---

**Advanced:** PHP, WordPress, WooCommerce, Linux, SQL, Windows, Office 365 (Admin), Apache

**Intermediate:** Odoo, Laravel, Git, GitLab, Docker, Java, JavaScript, VueJS, Spring Boot

**Basic/Essential:** Python, SAP Business One, PowerBI

## PROFESSIONAL EXPERIENCE (LAST 5 YEARS)

---

### Independent Developer — juberbox.app

February 2026 – April 2026

- Designed and oversaw the development of a platform for ride-sharing drivers (Uber, Didi, etc.) to share contact and banking details with passengers via QR code. Premium mode integrates with the Spotify API, allowing passengers to control in-car music in real time.
- Project developed using Claude Code (Anthropic AI agent), with me as technical supervisor: architecture definition, code review, design decisions, and functional validation.

Stack: Laravel (backend) · VueJS (frontend) · Astro (landing) · MySQL · Redis

### Independent Developer — trafkin.app

October 2025 – January 2026

- Designed and oversaw development of an inventory and sales management application for retail businesses.
- Project developed using Claude Code (Anthropic AI agent), as technical supervisor: system architecture, code review, design decisions, and feature validation.

Stack: Java Spring (backend) · React (frontend) · Astro (landing) · PostgreSQL · Laravel microservice

### Odoo Consultant — Joyería Sebastián

September 2024 – March 2025

- Enhancements to a custom Odoo 12 addon for comprehensive jewelry workshop management.
- Automated material calculation by job type, eliminating manual processes.
- Real-time material control per workshop master.
- Centralized sales reports by branch.

### Software Engineer / Technical Lead — ATIKA

May 2022 – March 2024

- Built a corporate intranet with Laravel and VueJS for internal operations management.
- Implemented a shipment tracking system (Leaflet + Simpliroute), reducing post-sale service calls by 40%.
- Integrated Odoo 15 with SAP: inventory sync and sales migration between systems, eliminating SAP licenses for the sales team.
- Deployed OS Ticket help desk, centralizing IT support and identifying recurring automation opportunities.
- Set up internal DevOps tools: GitLab CE, OCSInventory, Syspass.

### Consultant / Freelance Developer — Proyectastudio Digital Agency

Previous period

- Custom WordPress plugins for online pharmacies (Farmacia online, Construsalud): QR/ID-based exam management, business-day shipping calculator, digital prescription upload.

## **Consultant / Freelance Developer — Cubo Mágico Digital Agency**

*Previous period*

- WordPress plugins for e-commerce and services platforms: advanced search filters, subscription systems, and online class management.

## **Webmaster / Web Project Manager / Developer — Odepa, Ministry of Agriculture**

*Previous period*

- Technological migration and update of the institutional website.
- Mobile features and connectivity improvements for rural users.
- Bug fixes and improvements to Java applications (Spring / Struts).
- PowerBI reporting and maintenance of the 'A cuánto' mobile app.

## **EDUCATION**

---

- B.S. in Computer Engineering — Duoc UC (2007)
- Diploma in Project Management — Pontificia Universidad Católica de Chile (2012)
- M.S. in Information Technology (Incomplete) — Universidad de Chile (2014–2015)
- Computer Engineering (Incomplete) — Universidad Ucinf (1995–2000)

## **LANGUAGES**

---

- Spanish: Native
- English: B2 — Upper Intermediate
